FREE TESTOSTERONE	<20.	<29 pmol/L	
Free testosterone is estimated from measured total testosterone and sex hormone-binding globulin using Vermeulen's algorithm [J Clin Endocrinol Metab 84 (10):3666-3672, 1999]. Free testosterone results may be underestimated in pregnant patients due to interference by steroids (e.g. excess estradiol) binding to sex hormone-binding globulin.
